Texas Emigration and Land Company! 320 Acres of Land for \$20--160 Acres of Land for \$10.

THE TEXAS EMIGRATION AND LAND COMPANY having derived their Grant from the late Republic of Texas, by contracts made with the President thereof, under authority of the special acts of Congress, approved 4th February, 1841, and 16th January, 1842, granting lands to Emigrants, will continue to give 120 acres of land to families, and 160 acres of land to single men over 17 years of age, until the 1st day of July, 1848, conditioned that the family shall pay \$0, and the single man \$10, for the surveying fees. A family, as defined in our Contracts, must consis

veying lees. A tamily, as denned in our contracts, must consist of ...

"A man and his wife, with or without children."

"A widower with two or more children; if males under 17 years of age, if females, unmarried."

"A widow with two or more children; if males under 17 years of age, if females, unmarried."

"Two single men over the age of seventeen years, each one being entitled to 160 acres."

On his arrival in the Colony, the Emigran's should fortiwith apply to the Agent of the Company, Mr. Henry O. Hedgcoxe, residing at Stewartsville, in Benton county, who will at all times be ready to assist him in the selection of his land, and enter the same on books kept for that purpose, and give him a certificate therefor; which certificate will be evidence of his having settled in the Colony in due time.

same on books kept for that purpose, and give him a certificate therefor; which certificate will be evidence of his having settled in the Colony in due time.

Our Grant lies in the North-Eastern part of Texas, between the 324 and 34th degrees of Latitude North, and 19th and 22nd degrees of Louitude West, from Washington; beginning on the south side of Red River, at a point 12 miles east of the Palse Ouachitta, running thence due South 100 miles, thence East 164 miles, thence North 100 miles, thence West 164 miles to the beginning, having a front on the meanderings of Red River of nearly 300 miles; and includes within its limits the upper and lower Cross Timbers, and the head waters of the Brasos and Trinity Rivers, the Trinity being navigable for Steam Boats of light draught, from the interior of the Colony to the Gulf of Mexico, into which it empties, some 25 miles from Galveston, and Red River, to the Mississippi, affording an outlet for the surplus productions of the country. This portion of Texas is peculiarly adapted to the growth of wheat, experience within the last two years having tested the fact, that it will produce 40 bushels to the acre, weighing 65 to 10 pounds to the bushel. Indian corn, rye, barley, oats, sweet and Irish potatoes, peas, beans, melons, garden vegetables of all kinds, cotton, hemp and tobacco, and the celebrated muskeet grass which covers the prairies and upon which cattle subsist, and keep fat during the winter, and require only to be occasionally salted and kept together, to rear them in great numbers.

The planting season commences in February and continues

The planting season commences in February and continues until July. Colonel William Myers, who removed there from Garrard County, Ky., last fall, says, in a letter dated 8th May, 1847.—"I will not venture to tell my friends in Kentucky, because they would not believe it; but now I assert it, for the soil is deeper, being in many places five feet, and the kindest land to work I ever put a plough in. I verily believe that around the forks of the Trinity, lies the largest body of first-rate land in America."

Let no Emigrant loose sight of the important fact, that our contracts with the Government of Texas expire on the 1st day of July, 1848, and that he must not only be in the Colony, but that he must have selected his land, built a house or cabin thereon, and be residing therein with his family by that day;—one on, and be residing therein with his family by that day;—one day after that date, and the opportunity of getting lands for nothing is, perhaps, lost for ever. Persons desiring additional information, by addressing the undersigned Trustees or either information, by addressing the undersigned of them, post paid, shall receive prompt attention.

Prospectus of the Christian Mirror. Prospectus of the Christian Mirror.

This paper will be devoted to the discovery, illustration, and defence of truth—to the advocacy of whatsoever things are pure, lovely, and of good report. So far as it may be deemed expedient to give it a local character, it will aim more especially, to promote the interests of Apostolic Christianity in Kentucky. But a brief outline of its intended course, can be here sketched. I. A candid and thorough examination of the questions involved in Church Organization and Co-operation, will be attempted. The Bible Society question will be considered. Much investigation of these subjects is yet cemanded. Let no one deprecate discussion. In the midst of society in rapid progress, it is unavoidable, and is to be invited, rather than repelled. It is not discussion that is dreaded, but those angry versionalities, into which, even religious discussions too often descend. Nothing of these last, shall ever have a place on the pages of the Mirror. In general, nothing that can be personally offensive to any one, will be admitted, unless the defence of the community against imposture, shall urgently demand it.

will be admitted, unless the deener of the community against imposture, shall urgently demand it.

II. To furnish entertaining and instructive reading for the younger members of churches, being not the least important aim of our paper, we shall attempt, for their advantage especially, a brief exposition of the elementary principles, and ultimate

ms of the Reformation.

111. The subject of Education in general and of Female Education in particular, will receive such attention as we may be able to give. Hints, as to the best mode of instructing a family in the Sacred Scriptures, will be offered.

able to give. Hints, as to the best mode of instructing a family in the Sacred Scriptures, will be offered.

IV. Condensed reports from Churches and Evangelists, reports of State, Annual, and Co-operation meetings will be published; and any advertisement required by the common interests of the churches.

V. We shall endeavor to record in a few lines, the principal religious events of the tinues

VI. But especially, and above all things else, we shall invite our beloved brotherhood forward and upward to the higher grounds of godliness, brotherly kindness, and charity. It is mainly from a desire to accomplish something in this respect, that this prospectus is submitted to the public. The field we purpose cultivating, is not occupied fully by our writers, nor has it been. We shall, if possible, make the Mirror equal to our times, both in its mechanical and literary features, and yet, we shall aim to be useful rather than shining. Gladly will we forego the honor of being thought a philosopher—an accomplished essayist—a profound expositor, if we may but successfully invite the thousands of young professors away from the vanities of earth, to the enjoyment of the grace of Christ, the love of God, and the communion of the Holy Spirit. And whether we reason or discuss; reprove or rebuke; exhort or entreat; we intend that the paper shall, in some good degree, reflect the excellency of the knowledge of Jesus Christ our Lord.

Those to whom this prospectus shall be sent, are respectfully requested to interest themselves in behalf of our project. Should it succeed, the proceeds will shortly be appropriated to the benefit of a charitable institution, that every friend of the female orphan—that every philanthropist must approve. If our proposition is efficiently seconded, we shall be pleased, if not, we shall neither be offended, mortified, or injured.

pan—that every phintenthops in that approve. It out proposition is efficiently seconded, we shall be pleased, if not, we shall neither be offended, mortified, or injured.

TERMS—The Christian Mirror will be a monthly pamphlet of twenty four large duodecimo pages, printed with plain type on good paper, in printed cover—the whole neatly stitched and trimmed. It will be issued about the first of each month, and will be mailed to subscribers at One Dollar per year, payable on the receipt of the first number, or One Dollar and Fifty Cents when payment is delayed six months. The first number will be in every respect a specimen of the work. Should any one therefore subscribe, and upon the appearance of the work, distlike it, he can return the number, aad his name shall be taken from the list. This is only fair dealing. We wish no one to read or pay for that he does not approve.

All communications on the subject of the paper must be addressed, L. L. PINKERTON, Midway, Ky.

Those who may interest themselves in procuring subscribers, will please return their lists by the first of December next, it being our purpose to issue the first number about the beginning of January.

Any one wishing to subscribe, can send on his name alone, without seeing an agent.

wealth of Kentucky, That in consideration of the valuable services rendered by General Zachary Taylor in the Mexican War, that we tender to him our heartfelt thanks, and as a tribute of our respect extend to him an invitation and request, to visit Kentucky, during his retirement from the Army. In offering this, said Mr. S., I would remark, that I

am actuated by no motive, but that of the highest regard for the Old General's distinguished services. His brilliant victories, at the head of the American Army, are familiar to all, and entitle him to the respect, and confidence, of his fellow countrymen, ince his return to the United States. Several of the State Legislatures have adopted a similar resolution, extending to him a visitorial invitation; and I sincerely hope that the Legislative body of this Commonwealth, will show in common, with other Legis latures, a disposition to honor him, who deserves to

Mr. BOWEN moved to reconsider the vote had yesterday, upon the resolutions in regard to divorce

Mr. BOWEN saidhe voted for the resolutions yesterday, under the full conviction and belief that their adoption would facilitate business, and hasten the close of the session; but he was now informed by persons who had long been members of this body and had seen the practical effects of a similar reso lution, that it had a tendency to retard, rather than to facilitate the business of this House. He was now convinced that the tendency was to retard business, and it was for that reason that he moved the reconsideration. He did not believe in divorcing every man or woman who might request it, from that contract, which above all others, should be holden most sacred; but if this House extends privileges to one class of applicants, it ought to extend them to others having equal claims. He asked if there was a man on this floor who would not strongly urge the case entrusted to him, when others of a resolution would not be enforced, but if it was, it

would reject many cases of merit. Mr. HARDY said he was not going to make a speech upon this motion, but he had a few words to say. He had been a member of this House for several years, and similar resolutions had been passed He thought the resolution a good one, and if en-Mr. CULTON—a bill regulating the manner of forced, would much facilitate the business of the docketing causes in the Court of Appeals; read House. For the Common wealth. THE NEXT GOVERNOR.

My Countrymen-The present condition of public affairs calls upon you for an exercise of your vigilance, your prudence, and your energy.

A Convention is soon to be held by the Whig party to nominate a candidate for Governor, and I tell you that everything depends on the selection that may be made. You must nominate the man who can rally all the Whig votes-the man against whom there are no rivalships and heart-burnings among the leading politicans of the party-who has claims upon his country for military and civil service, and whose concilliatory deportment will neutralize some of the opposition of the democratic

I served you as Governor when we were preparing to to enter upon the trying times of the last war, and I claim a right to give you my advice-listen to

I was elected because I was a Farmer and had been a Soldier. My chief competitor was an eminent lawyer against whose character there was no objection-but the people of that day thought I was honest and would administer the affairs of the State with a single eye to the public good. They knew I had no selfish motives beyond my term of office.

They had elected old Shelby because he was a farmer and had been a soldier, and they elected Madison, and Adair, and Desha, and Metcalfe, because they were farmers and had been soldiers; and in no case has a lawyer been elected except in a contest with a brother lawyer.

Now my advice to you is to nominate Colonel CHARLES S. TODD. He is a Farmer, and all his competitors are Lawyers. He has fought for his country under old Tippecanoe, to whom I gave the command of the army. I gave Todd his first commission. I knew the boy would come out well, and if you will try him he will come out well again, Listen to OLD CHARLES SCOTT.

A discovery was made on Thursday in the Convent of San Domingo, in this city. Some of the troops who arrived with Gen. > From the New Orleans Delta, Dec. 23. Mexico, Dec. 13, 1847.

We have advices from Queretaro to the 9th inst. The Mexican Government is in a most deplorable The citizens of Washington city have invited condition. Although there are signs of a pronunciament now in existence, it is doubtful whether there is any chieftain, in the present distracted state of Several awkward blunders occurred in our report to command the elements necessary to succeed in the country and the prostration of all business, able of the proceedings of the House of Representa- such a movement, the principal requisite being motives on yesterday. They were chiefly in mista- ney. Any man who heads a revolution must satisfactorily show the persons he enlists in his cause that he will be able to pay them better than they were paid previously, and that he has means sufficient to carry out all his projects. If, thereafter, kind. Gentlemen will confer a favor by pointing he fails to comply with his pledges, his downfall will out any little inaccuracies that may occur, and we be more speedy than his rise to power and authority. Therefore I conclude it is extremely doubtful whether any party will be able to succeed in overthrowing the present Government, as it is with great difficulty that the party now in power can furnish the amount daily required for the ordinary routine of the affairs of Government, both their internal and coastwise revenues being almost entirely cut off, and every new party coming into power would have to depend upon their individual resources for the money necessary to support the Government proper, the army and "hangers-on" without which they A Telegraphic despatch from Washington to the Cincinnati Atlas, says: It was reported to-day that the "private stealings" would be small, therefore offer but little inducement to speculators. The only advantage a new party could gain by coming into power, would be to make a peace, with themselves power, but in case they would succeed in negotiating, the Congress to meet in January of the coming year would not confirm it, as a large majority have been elected from the present party in power, and are pledged to support the present Government. With such a state of affairs existing, what can the revolutionary spirits accomplish?

I informed you, in my letter of the 4th instant, that the Government at Queretaro were willing and anxious to make a peace; that if the depatches to Mr. Trist had been three days longer reaching him, a treaty would have been concluded-of this there is no doubt. My informant is a gentleman of Queretaro who is well conversant with the movements and measures of the Mexican Government. He also informed me, as I then wrote you, that the convention of Governors, which adjourned about the 1st inst., were unanimous in their views, that the only way for the Mexicans to preserve their nationality and retain any portion of their territory was immediately to conclude a peace—"an honorable peace"—and that it was "not dishonorable in them to sell their territory;" and, furthermore, that the Governors there assembled and the National Government had mutually pledged themselves to the support of each other, if they succeeded in concluding with Mr. Trist a treaty of peace. The commissioners on the part of Mexico have been in this city, and, I am informed, have been endeavoring to arrange with Mr. were supposed to be under the command of a de- Trist. Whether they have succeeded, no person as yet is apprised; but I hope, for the interests of our country, that he will, if he is so enabled, go home

> Not only the interests of the country, but the inthe world and the preservati or of our gallant little army, who labored so hard and accomplished so much, requires it at his hands. One thing is certain: Mr. Trist did not go home with the last train which left here on the 9th inst. From this we might conclude that he intends having some understanding with the Mexicans before he leaves. I think it altogether probable he will either make a treaty or take home with him the propositions of the Mexicans. If he makes a treaty there is but little doubt of its being confirmed immediately after the organization of the Mexican Congress in January. If he does so, it will prevent the necessity of our extending our military line of operations at a great trouble and expense, some five hundred miles further. In the course of the next ten days I will be fully informed what is the correct state of affairs at Queretaro, and if there is any amicable arrangement entered into, you may depend upon being correctly informed

thereof at an early date. The army is now about being thoroughly reorganmade of the death of Gen. Herrera, although such | ized-the new and the old regiments so disposed of as to give the whole a better tone, and I have no doubt add to its general efficiency-and if the presny of dragoons arrived yesterday from Jalapa, and ent peace movement does not result in something to his politeness we are indebted for a few items of definite in the course of the next two weeks, a division of 4,000 effective men will be despatched to General Butler left Jalapa on the 6th for Puebla. the mining districts situated in Zacatecas, and the The train which he commanded has also left that States thereto adjoining. On the 7th inst., Gen. Patterson, with his command, arrived at this point. It was composed of the following troops, after leaving garrisons at the different points on the roads: 1st Penn. reg., Colonel Wynkhoop—450 men; 1st Mass. reg., Maj. Webster-450 men; battalion of Major Lally, II companies-700 men; battalion of Captain Alvorda, 6 companies-550 men; battalion of Capt. Simmons, 3 companies-250 men; 1st reg., Texas cavalry, Colonel Hays-500 men; company K, 1st drag.,

Lieut. Armstrong-75 men: 2.935 men. I have several times been asked by some of the inhabitants, if the Texans will be allowed to go out into the streets without a guard over them. It is really surprising that men with such a reputation should be among the very best disciplined troops in our army, and not disposed to commit outrages, or create disturbance in any way. But the greasers must not interfere with them, as was illustrated this evening. About an hour ago some of them were quietly passing through one of the streets, when a crowd of leperos gathered around them and commenced throwing stones-the result of which was that in a very few minutes there were ten dead Mexicans lying in the street, and two men badly wounded, taken to the guard-house.

(CONTINUED.) The institutions for the promotion of Science, are entitled to high commendation. The records of the Imperial Academy of Sciences, show a valuable addition to the universal department of knowledge. Their researches by land and by sea, are worthy of a place by the side of those prosecuted by Great Britain, France and America. The Observatory, near St. Petersburg, is an honor to the imperial taste, and contains the largest Telescope in the world, that at Cincinnati being next, both manufactured at Munich in Bavaria. The Museum connected with the Academy of Science, is admirably arranged with choice specimens, from every quarter of the Globe; among them the remains of the Mammoth, found 60 years ago on the ice in the river Lena, the Mississippi of Siberia, the hide and some

The Imperial Botanical Garden is a proud monument of the public taste for this interesting science. The plants occupy a space of three quarters of a mile, and have been collected at vast expense, from every climate of the Globe. Rich contributions have been made from Brazil, the Cape of Good Hope, from Australia, and from the Himalaya Mountains, in Asia. A visit to this great panorama of nature, will be gratified by an inspection of the green and black tea trees of China, of all the acacias of the east, of all the fruit trees of the tropics, and even the cane of the Mississippi. The collection would be unrivalled, if it had that most magnificent of evergreens, our own noble Magnolia. Imperial Library contains 400,000 volumes, and 20,-000 manuscripts, among them a letter from Washngton, whom they regard as our Peter.

of the flesh still remaining.

The system of Public Instruction is entrusted to Minister of State. There are five Universities in the Empire: at St. Petersburg, Moscow, Kazan, on the Volga, Keif, near the Black Sea, and at Dorpat, near Riga, on the Baltic. The Colleges for boys, and Institutes for girls, are sustained on the most liberal plan, while it is to be regretted, that the efforts of the government to disseminate schools among the peasantry are not attended with the success their importance demands. There is a College connected with the Foreign Office, in which those destined for the diplomatic service, are taught the Asiatic languages. It is this system, and their aptitude to acquire foreign languages, that gives such effi-

onveys a just impression of the public taste; it contains a rich collection, not only of foreign and an-Artists. The Russians are distinguished as copyists. Their genius is particularly displayed in the erection Mercer co.; A. C. Keenon, Franklin county; J. C. Musselman Peter, in the St. Isaacs Square, is the most cele- W. B. Armstrong, Vermont; H. Huett, Lexington; H. C. Thomsailles, and the Louvre. The Imperial Arsenal, at Tsarsko-Celo, is a remarkable curiosity; the armour of the last six centuries is there displayed; the object of deepest interest in the collection, being the elebrated Tippoo Saib, setting upon the stuffed skin of his identical War Horse, the most perfect

model of that animal extant. In touching briefly upon the Fine Arts, I may add that too much commendation cannot be awarded to the genius and policy of Peter, who inculcated among his subjects, by his own noble example, the importance of the Mechanic arts, to the welfare of a State. He visited Holland to study the trade of a ship builder, and I saw near the Church of the Ancient Fortress, where the remains of the Imperial family are deposited, and near the Mint in which the precious metals of Siberia are coined, the first boat which that great artist constructed, and with which he navigated the Baltic. This practical knowledge became the means of several victories over the Turks, in which the Czar, himself, was the Admiral, and I saw, also, the first log cabin he had erected on the Island, where the veneration of his people has preserved the clothes and the implements with which he followed the trade of a Cobbler, presenting to his subjects, the same brilliant contrast of public usefulness, to the lazy career of the nobility, which the great Roger Sherman, the Shoemaker of Connecticut, exhibited to the aristocracy of our own country. But it should be borne in mind, that the handicraft specimens of the great Mechanic, were only the trifles of his industry-that these did not interfere with his gigantic energy, as a statesman, in consolidating various tribes into one government, and in giving character and nationality to the whole mass of what were then his barbarous subects; nor did his enlightened plans of policy arrest his efforts, by skill and valor in the field, to fortify his dynasty against the invasion by Charles XII.,

The Literature of Russia deserves more respect than the journals of other nations have assigned to it. In the departments of history, of science, of poetry, and of diplomacy, she should rank with many nations claiming to be more civilized. The language resembles the Greek in sound, having six Greek letters in the alphabet. Their historians have been already named-Lomonosoff, Kantemar, Derjavine, Pouschkin, and Koukolnic, will compare with the Poets of ancient or modern times, whilst the fame of Romanzoff, Lieven, Mateuzewic, and Nesselrode, will descend to posterity in the same diplomatic wreath with that of Talleyrand, Metternich and Castlereagh, and only equalled by the ability that has distinguished the State Papers of our own loved land.

The Commerce of Russia is chiefly internal and continental, especially in the interchange of products with China and the East Indias. The vast canals commenced by Peter, have been completed by his successors, and there is now an internal communication between the Baltic and the Caspian sea, independently of canals in Siberia that lead to rivers emptying into that great inland lake. route the coarse cloths of Russia find their way to Kiatka, on the frontier of China, and the famous tea of the East, grown only in the Northern districts, and never exported by sea, is brought to the Caspian, and thence up the Volga to the great annual Fair at Nishnai Novogorod, and thence by that river and canals, to St. Petersburg. This voyage is effected in two years, owing to the long winters blocking up the canals. The Foreign Commerce is carried on from St. Petersburg and Riga, on the Baltic, and from Odessa and Tangarog, on the Black sea. I deem it unnecessary in this place, to speak of the extent of this Foreign Commerce, being content to allude only to the character of her import dutiesthese are eminently protective upon all the articles entering into competition with her manufactures, and are, in some instances, prohibitory, as in the case of the direct introduction of our tobacco; whilst our cotton is scarcely burdened with any duty. A recent Ukase, permitting the introduction of crushed sugars from England, has nearly destroyed the indirect trade so profitable to our navigating interests, in which we send the Havana sugars to Russia. It is a source of satisfaction, however, to know that the manufacturing establishments in that Empire, are inducing a fourfold increase in the consumption of our cotton.

The Agriculture of Russia has not advanced as

An address delivered before the "Frankfort Athe- rapidly as her other branches of National industry, lightened labors of an Agricultural Society, of which I had the honor to be elected a member. A laudable spirit, however, is just waking up there, as elsewhere, to advance this greatest of National interests. The implements of husbandry in the interior, are of the rudest kind, though the cheapness of labor enables the cultivator to prepare his lands in a mode much neater than we should expect from the character of the implements. In this respect, a happy change is taking place in the desire to procure from America the improvements that distinguish our genius and energy, of which we have a gratifying evidence in the selection of a celebrated American Engineer, Major Whistler, to superintend the Railroad to Moscow, 440 miles, and the employment of Messrs. Harrison, Eastwick and Winans, to construct the locomotives and cars, a proud monument to American genius, skill and integrity. Indeed, all the valuable inventions of our country are sought for, except our greatest invention, that of a Representative Democracy. The Agricultural Society of Russia is beginning to exercise the wholesome influence of giving dignity to the profession. The Emperor often suggests plans for its consideration, and adds valuable premiums for judicious improvements. Two of these plans were intimately connected with the National welfare-one to procure an account for the most improved mode of kiln drying grain, for exportation to the warm climates, and the other, the most effectual scheme for preventing a scarcity of food in one province, whilst there should be a great supply in other provinces. This great desideratum is to be obtained solely by the construction of good roads and other facilities of inter-communication, and is doubtless occupying at this time the sagacity and energy of her indefatiga-

> ble sovereign. In traveling to the interior, I was struck with the practice, so little known among us, of women reaping in the harvest fields, a practice so general on the continent, and which is even tolerated in intellectual Scotland. In Russia, as indeed throughout the continent of Europe, the fields are cultivated without division fences-the cattle and the sheep are attended by shepherds with their dogs, while the pigs are kept up in small lots near the dwelling. How dtfferent from the vast extent and care bestowed in our country upon fences, to head that little animal!

\$70 REWARD.

ESCAPED from the Kentucky Penitentiary, on Sunday night, the 21st instant, a convict named ELISHA SKETOE. Said convict is about 22 years of age, (quite small for his age,) is only about 25 feet 6 inches high; weighs about 130 pounds; delicate regular features; small black eyes; from his hair and general appearance, he looks like he might be part Indian or Spaniard; is very ignorant, having no education, and but little natural sense; looks down when spoken to; and with a very slight examination and questioning may be detected. Said convict took from my stable, and rode off, a dark bay horse, about four years of age; at least fifteen hands high; long-bodied, and slender built, with a very long black main and tait; no spots upon him; has not been ridden much, and is quite skittish; is what judges would term a "very clever horse."

The saddle he rode is about half worn, doubled skirted, with knee puffs upon the skirts. The girth has been broken and tied

buffs upon the skirts. The girth has been broken and tied her; black bridle, single nead-stall, double reigns; one of gns ripped in two; old fashioned curb bit, with long jaws with rough.

I will give \$70 for the arrest and delivery of the convict and orise; or fifty for the convict alone; or \$20 for the horse; or a libral reward proportionate to the above, for the arrest and deention of the convict and horse, so that I may get them.

NY, No. 29, WALL STREET, NEW YORK.

This Company, which confines its business exclusively to Life Insurance, has now been in operation two years and a half, during which period it has issued 15.3 policies, and for the first eighteen months it experienced no loss. Its losses for the whole time have been less than \$18,000-leaving an accumulation of about \$65,000 on hand, beyond the payment of claims and expenses. This, added to the original guaranty cap ital of \$50,000, places the security of the Company on a basis so solid as no longer to admit of a rational doubt.

All its profits accure to the credit of the dealers, and are divided annually among them, whether the policy be issued for a limited period or for the whole term of life, a feature unknown in the charter of any other Mutual Life Insurance Company incorporated by this State.

Two dividends of 50 per cent. each, on the amount of premiums received, in accordance with the provisions of the charter, have been declared, and are credited to the accounts of the assured, and for which scrip certificates will be issued.

A dividend of 6 per cent. on the first year scrip has likewise been declared, payable in Cash, to the holders thereof on DEMAND, at the office of the Company.

For policies granted for the whole term of life, when the premium therefor amounts to \$50-a note for 40 per cent with interest at 6 per cent.—without yuaranty, may be received in part

MILITARY INSTITUTE.

This Institution, created by an Act of the General Assembly will be opened for the reception of Pupils,

On the 1st of March, 1847, under the immediate di-rection and entire control of a Board of Visitors,

Appointed by the Executive of the Commonwealth. T contemplates a Military Organization for Literary and Sci-tentific purposes; an education eminently scientific and prac-tical; the formation of regular habits, and the diffusion of a knowledge of Military Science.

knowledge of Military Science.

Military duties will not be permitted to interfere with the pupil's progress in study, but will rather take the place of his unprofitable, and often, vicious play.

The course of study adopted, and which will be required in order to graduation, is that usually taught in the best Colleges, except that but one language is required, (Latin or French,) the time usually occupied by the second, being devoted to a more extended course in Mathematics, Natural Science and English Literature.

tended course in Mathematics, Natural Science and English Literature.

A Preparatory Department is organized in connection with the Institute, in which boys of any age are taken, and are subjected to the same Military discipline as the Cadets.

The position of the Institute, at the Franklin Springs, near Frankfort, Kentucky, (recently occupied by the Franklin Institute,) is admirably adapted in every respect to Academical purposes; the locality being airy and healthy, the mineral waters salubrious, the buildings elegant, extensive and commodious, and entirely apart from the contamination and multiplied malign influences, which seem inseparable from a city or village residence.

The Institution is placed under the charge of Col. R. T. P. ALLEN, as SUPERINTENBENT, who has been brought prominently before the public, as a competent and successful teacher and governor of youth, by his homorable graduation at the United States Military Academy; his subsequent connection with the Army, and with the Engineering Service of the General Government, as Superintendent of public works; by his long experience as an Instructor, by his recent connection with the Transylvania University.

The Academic Year will be divided into two Sessions of twenty one weeks each.

The first commencing on the 1st Monday in October, and the second on the 1st Monday in March. The only vacation occupying the months of August and September.

The month of July will be spent in an excursion tarough the State, for the better study of its Geology and of Natural Science

Applicants for admission, on paying the charge of the Institute Applicants of admission, or paying the charge of the institute, and presenting a certificate of good moral character, will be admitted into the classes as their advancement may justify, and poor satisfactorily passing the next examination thereafter, will be entitled to a warrant of appointment, as Cadet, from the Governor. The uniform of the Cadets is plain and neat, and being of Kentucky Jeans, will greatly reduce the expense of their clothi

Dr. Penney's Ague Pills.

IN presenting the public with this remedy for the most troublesome of Western diseases, I am not unapprized of the opposition that it will at first meet; for the community has suffered much by the impositions and frauds practiced by the getters-up and venders of patent nostrums, specific remedies, and medicines professing to cure all diseases. So much have the people suffered from such infractions on their credulity, that it would seem foolish in any one, at this day, to introduce a specific for any Disease; but I do it, and do it too, sanguine of success. Having had ample opportunity to test the efficacy of the Ague Pills now presented to the public, I do assure it, that they have never failed to cure in one solitary case where the directions were strictly observed.

strictly observed.

They seem equally as well adapted to Agues of long standing as more recent ones. I could adduce a great many certificates in support of what has been said above, as regards their success; but that would swell, unnecessarily, this publication A few rebayment, of it may be paid in cash, it which case it is expected, should the party survive to make 13 annual payments, leaving the dividends to accumulate—the policy will be fully paid for, and the accumulation ultimately added to the policy.

For further information, the public are referred to the pamph lets, and forms of proposal, which may be obtained at the office of the Company, or any of its Agencies.

Lawrenceburg, Ky., Oct, 1847.

This is to certify, that I have been selling Penney's Ague Pills as local Agent for this place since some time last spring; and in every solitary instance that has come to my knowledge, they have succeeded in caring the Chills and Fevers. I heartily recommend them to the public, as a remedy every way worthy confidence.
